

Next-generation bearing search campaign

high speed! Bathing! problem solving! "Is that okay?"

Purpose

Are you using patented technology without knowing it?
You may be subject to shipment suspension and penalties!

discrimination

Since it is difficult to judge patent infringement, we are soliciting information at the "possible" level. If it falls under any of the manufacture, sale, or use in Japan, the United States, or China, it will be a patent infringement.

what to do

Please send the actual item, photos, and information to the empty space by registered mail.
We will keep it confidential.

success fee

We will investigate the information received and notify the other party if it is determined to be illegal. As a result, we will pay 10% of the total reward if we obtain the patent royalty. In addition, even if it cannot be determined that it is illegal, we will report the content to the information provider.

- This is a compliance promotion campaign. Never do anything that violates the law when collecting information.
- We sell ADB (bearings) and transfer technology. Please refer to the homepage.
